Planning Monitoring
Budgeting as a Planning and Monitoring Tool

Allows you to:
• Define organizational goals.
• Tie into strategic plan.
• Outline resource needs and uses to accomplish goals.
Budgeting as a Planning and Monitoring Tool

Allows you to:

• Monitor progress throughout the time period.
• Show differences between plans or goals and actual use.
• Take corrective action as problems arise.

What about grant budgets?

- If your organization receives a lot of restricted foundation funding or government contracts, you need to move up steps 1, 2, and 3 so that you can budget strategically.

6 Stages of Budgeting

1. Setting goals and context
2. Estimate costs
3. Forecast income
4. Bridging the gap
5. Approve the budget
6. Implement and monitor the budget
What is the problem that needs solving.

What will you do about it?

What will that cost you?
  – Who would and why should someone pay?
    – Marketing, Fundraising

Step 1: Setting Context and Goals

Review past performance
  – Financial metrics (What is your reserve?)
  – Program metrics (How many people did you serve?)

• Review strategic or business plan
  – What are your goals?
  – Where should you be on goals?
  – Where any assumptions incorrect?
Step 1: Setting Context and Goals

- Look at external environment
  - Is there new competition?
  - Have the needs of your constituents changed?
  - How is the funding environment or economic condition?
    - Is it time to be aggressive?

- Articulate goals
  - Program priorities – BE CLEAR!
  - Stretch versus core

Step 1: Setting Context and Goals

- This step is often skipped!
- Very important, because it can be done with focus on mission – takes the emotion out of financial decisions.
- Really is what makes the budget the crossover from the strategic plan to operational plan.

6 Stages of Budgeting

1. Setting goals and context
2. Estimate costs
3. Forecast income
4. Bridging the gap
5. Approve the budget
6. Implement and monitor the budget

Step 2: Estimate Costs

Key points to remember:
- We started with what the organization wants to do versus what the organization has money to do. This step should look at the costs for accomplishing the goals.
- Use historical data, but factor in price increases.
- Where do we start?
Step 2: Estimate Costs

Personnel Costs!

• Create a staffing plan.
• Again, not based on who is currently working there and how they are funded, but rather how many people you need to cover your goals.

Staffing Plan

• Used to determine personnel related costs for each activity.
• Also typically used to allocate shared costs.

• What are shared costs?

Shared Costs

• Also called common costs
• Those costs that are shared or common to multiple activities (programs, admin and fundraising.)
Shared Costs

- Also called common costs
- Those costs that are shared or common to multiple activities (programs, admin and fundraising).

Typical Shared Costs
- Rent
- Liability insurance
- Telephone, utilities
- Technology
- Office supplies

Who Budgets for Shared Costs?

Budgeting Core vs. Expanded

- Think about what is new and what is the core of your program?
- Can we realistically just keep adding services or tasks?
- Who will pay for new services?
- Is there new technology or theories that will help us deliver on our mission?
6 Stages of Budgeting

1. Setting goals and context
2. Estimate costs
3. Forecast income
4. Bridging the gap
5. Approve the budget
6. Implement and monitor the budget

Step 3: Forecast Income

Contributed Support

Earned Revenue

Sources of Support
- Individuals
- Foundations / grants
- Corporation
- Special events
- Planned giving
Step 3: Forecast Income

Contributed Support
• Put together a plan.
  – Prospects into donors.
• Look at historical data
• What is happening with the economy?
• What is your return?

Sources of Support
• Individuals
• Foundations / grants
• Corporation
• Special events
• Planned giving

Grant Support Considerations

• Discounting grant asks and cultivation of foundations.

Step 3: Forecast Income

- **Earned Revenue**
  - Understand your true costs
    - Shared costs
    - Administrative costs
  - Are you competitive?
  - Can your constituents afford that?
6 Stages of Budgeting

1. Setting goals and context
2. Estimate costs
3. Forecast income
4. Bridging the gap
5. Approve the budget
6. Implement and monitor the budget

Step 4: Bridging the Gap

• Coming up to the perfect budget…
• First question . .
  – Does the budget have to balance to zero?

• Coming up to the perfect budget…
• First question . .
  – Does the budget have to balance to zero?
  – NO!!!!
Step 4: Bridging the Gap

• How much do you have in reserves?
• Do you need to build a reserve?
• What life cycle stage is your program in?

Step 4: Bridging the Gap

• What are your strategies for bridging the gap?

Step 4: Bridging the Gap

• Go back to the priorities that were set in Step 1.
• What is a high priority for the organization to accomplish this year?
Step 4: Bridging the Gap

• Cash flow projections:
  – Does the cash flow work for this budget?
  – Do you need to move income or expenses around?
  – Strategy / Operations / Finance

What about contingency budgeting?
6 Stages of Budgeting

1. Setting goals and context
2. Estimate costs

Approving the Budget

Finance committee

Board Meeting

Approving the Budget

- Presentation is important as it is a key opportunity to focus the board on how to read and understand the financial statements.
- Drive the conversation with functional statements.
6 Stages of Budgeting

1. Setting goals and context
2. Estimate costs
3. Forecast income
4. Bridging the gap
5. Approve the budget
6. Implement and monitor the budget

Step 6: Implement and monitor the budget

- Make sure chart of accounts is consistent with budget.
- Categorize income and expenses the same way you did in budgeting.
- Compare budget to actual.

Budget to Actual Reports

- How often do you prepare?
- Consider your audience.
  - What do they need to know?
    - Development
    - Program
    - Board
